DCCS 410 Bigdata Distributed Processing System

Final Project

Due Wednesday, December 16, 11:59pm.

The final project is an opportunity to delve deeper into an area of interest. You are expected to demonstrate your ability to handle big data using the methods and techniques learned in class. The project will be completed in three steps.

1. **Proposal (Due 10/21)** (10 points)

   Submit the one-page proposal that includes:

   - Title
   - Student name
   - Project objectives: describe how you plan to use big data
   - Project summary: describe how you will handle big data
   - Project timeline: provide a list of milestones

2. **Presentation (Due 12/8)** (20 points)

   Present your work in the class in 5 minute talk. Highlight your achievements and demonstrate you handled big data. Discuss the challenges you encountered and explain how you overcome them.

3. **Report (Due 12/16)** (10 points)

   Submit the final report along with the source files for your work, including any test result you made. The final report should include:

   - Title
   - Student name
   - Project objectives:
   - Project summary:
   - Project timeline: Actual timeline you achieved

   If your work is published on GitHub, it will be considered as having submitted the source files. Simply include your GitHub link so that I can access it.
